INCI status: Partially verified

Where more than one CAS number is shown, the botanical substance is registered under several CAS numbers (e.g. EINECS and TSCA variants); all refer to the same INCI name.

| 3. Manufacturing    |                                                                          |
|---------------------|--------------------------------------------------------------------------|
| Process             | Cold infusion in carrier oil, aged                                       |
| Ageing / maturation | 180 days                                                                 |
| Additives           | No added colours, fragrance or preservatives unless stated on the label. |

| 4. Typical properties |        |
|-----------------------|--------|
| Physical state        | Liquid |

|                            |                                                                           |
|----------------------------|---------------------------------------------------------------------------|
| <b>Appearance / colour</b> | Characteristic of the plant material; may vary naturally between harvests |
| <b>Odour</b>               | Characteristic                                                            |
| <b>Solubility</b>          | Oil-soluble                                                               |
| <b>Flash point</b>         | Typically > 200 °C (vegetable oils; not determined for this batch)        |

Typical values describe the product type and are not a specification. Batch-specific results (assay, moisture, microbiology, heavy metals as applicable) are given on the Certificate of Analysis, available on request.

## 5. Applications and use

|                            |                                                                                                                              |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>Applications</b>        | Hair care, Perfumery, Skincare                                                                                               |
| <b>Markets</b>             | Cosmetics & personal care                                                                                                    |
| <b>Suggested use level</b> | Typical use level in cosmetics 1–10 % (oil-soluble and infused oils up to 100 % of the oil phase); carrier oils up to 100 %. |

The formulator is responsible for confirming suitability, stability and regulatory compliance of the finished product in the intended market. Not intended for direct medicinal use.

## 6. Packaging, storage and shelf life

|                   |                                                                                                                                                                                                      |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Pack sizes</b> | 225 g, 1 Kg — bulk and custom quantities on request                                                                                                                                                  |
| <b>Storage</b>    | Store in tightly closed, well-filled original containers in a cool (below 25 °C), dry, dark place away from heat, oxidising agents and direct sunlight. Butters and waxes may soften above 25–35 °C. |
| <b>Shelf life</b> | 18–24 months from the date of manufacture in unopened original packaging stored as recommended. Infused and oil-soluble extracts: 12–18 months.                                                      |

## 7. Documentation and quality

|                                |                                                                                 |
|--------------------------------|---------------------------------------------------------------------------------|
| <b>Safety Data Sheet</b>       | SDS-10243-HRBC-COFFE — available for download on the product page               |
| <b>Certificate of Analysis</b> | Batch-specific COA available on request                                         |
| <b>Other documents</b>         | Allergen, IFRA, origin and other statements on request, subject to availability |
